UGANDA BUREAU OF STATISTICS

CONSTRUCTION INPUT PRICE INDEX AND INFLATION

SEPTEMBER 2022

1.0 Annual Headline Inflation

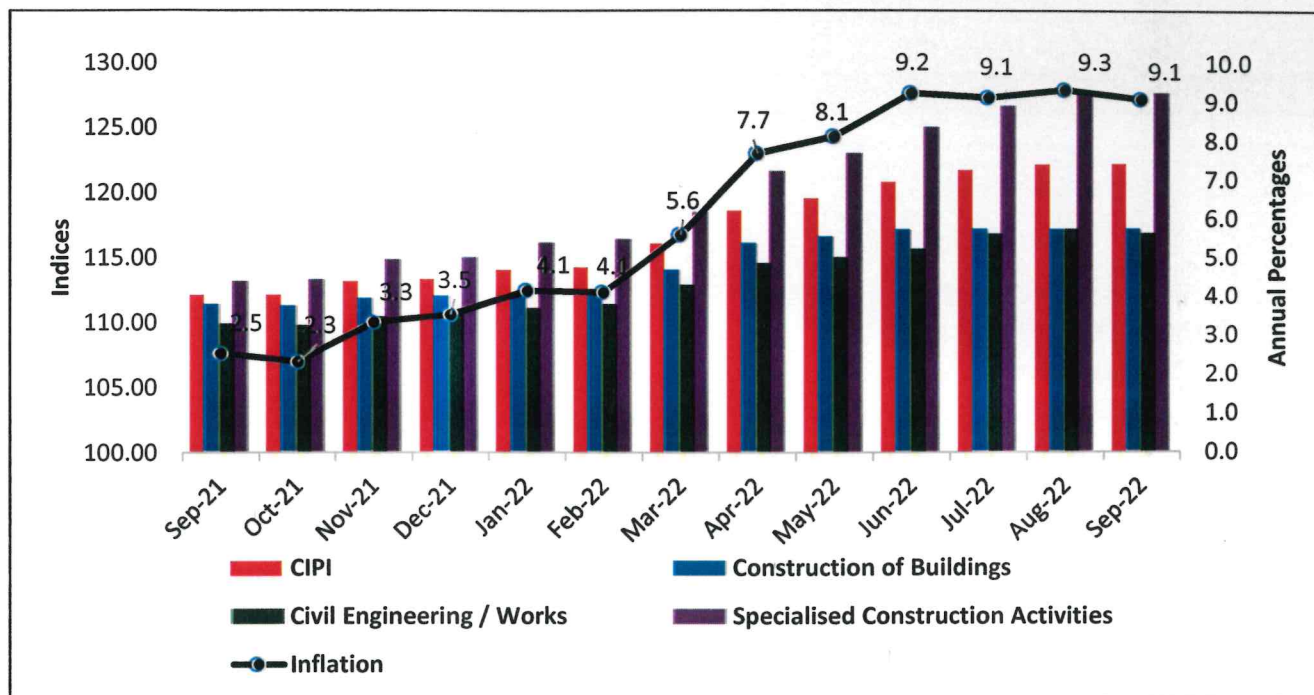

The inflation as measured by the Construction Input Price Index for Uganda for the 12 months to September 2022 for inputs into the construction sector (*covering material prices, wage rates & equipment hire rates*) was registered at 9.1 percent compared to 9.3 percent registered in August 2022, see Table 1. This is mainly attributed to the annual inflation of inputs for construction of buildings, which was registered at 5.3 percent for the year ending September 2022 compared to 5.5 percent registered in August 2022.

The main driver for the inflation of inputs into construction of buildings is construction of non-residential buildings whose annual inflation was registered at 5.3 percent in September 2022 compared to 5.6 percent registered in August 2022. In addition, the annual inflation of inputs into construction of residential buildings was registered at 5.2 percent in September 2022 compared to 5.4 percent registered in August 2022.

The annual inflation of inputs into civil engineering / works was registered at 6.4 percent in September 2022 compared to 6.9 percent registered for August 2022. This was mainly attributed to the annual inflation of inputs for construction of roads and railways which was registered at 6.5 percent in September 2022 compared to 7.1 percent registered in August 2022, see Table 2.

The annual inflation for specialised construction activities was registered at 12.9 percent in September 2022 compared to 13.1 percent registered in August 2022. This is mainly attributed to demolition and site preparation whose inflation was registered at 37.7 percent in September 2022 compared to 38.4 percent registered in August 2022. Specifically, the inflation of inputs for building completion and finishing was registered at 6.4 percent in September 2022, compared to 6.5 percent registered in August 2022. However, the inflation of inputs for electrical, plumbing & other construction increased to 4.9 percent in September 2022, up from 4.8 percent registered in August 2022.

The overall annual Construction Input Price Index and inflation according to ISIC Divisions for the 12 months to September 2022 are shown in Table 1 and Table 2 respectively.

2.0 Monthly Inflation

On a month to month basis, the inflation of inputs into the construction sector was registered at 0.0 percent in the month of September 2022 compared to 0.4 percent rise recorded in August 2022.

This was mainly due to 0.1 percent rise in inflation of inputs for specialised construction activities in the month of September 2022 compared to 0.7 percent rise registered in August 2022. Specifically, building completion and finishing inflation increased by 0.3 percent during September 2022 from a 0.2 percent drop registered in August 2022. In addition, electrical, plumbing and other construction installation activities inflation rose by 0.1 percent in September 2022 compared to 0.4 percent registered in August 2022, see Table 3.

In the month of September 2022, products whose inflation decreased included; diesel by 0.3 percent in September 2022 compared to 2.9 percent registered in August 2022, Aggregate by 2.3 percent in September 2022 compared to 0.0 percent registered in August 2022 and Binding Wire by 1.3 percent compared to 0.0 percent registered in August 2022.

However, the inflation of sand rose by 3.8 percent compared to 0.1 percent registered in August 2022, cement inflation rose by 0.6 percent compared to 1.0 percent drop registered in August and concrete bricks, blocks & slabs Inflation rose by 1.1 percent compared to 0.0 percent registered in the month of August 2022.

The overall monthly Construction Input Price Index for the 12 months to September 2022 are shown in Table 4 below.
